Muscle anatomy

HOW IT WORKS ?

IT IS NOT ONLY ABOUT FAT

Voluntary contractions may increase the demand for energy from fat cells. Released epinephrine signals the fat cells to initiate lipolysis.

Intensive supramaximal contractions enhance release of epinephrine which triggers a cascade effect leading to supramaximal lipolysis in fat cells.

The free fatty acids (FFAs) overflow causes cell dysfunction and induction of apoptosis - programmed cell death. Dead cells collapse and are naturally flushed away.

Intensive supramaximal contractions stimulate muscles' response with a deep remodeling of its inner structure, results in increased muscle density and volume.

Myofibrillars loosen

As age grows, Myofibrillars are loose and fragile because of pregnancy, fat accumulation, lack of exercises and other factors. People become fatter and flabbier.

Myofibrillars break

The equipment interact with muscle neurons to induce supra maximal muscle contractions. In the process of continuous muscle contractions, part of Myofibrillar are gradually broken to cause muscle self-repair.

Myofibrillars repair

After treatment, Myofibrillars tend to be strong and tight. Muscle becomes firm and elastic. It responds with a deep remodeling of inner structure that result in muscle building and growth and body shaping.

TO GET AN ATTRACTIVE BODY YOU NEED TO BUILD MUSCLE

GENESIS
BODY SCULPTOR SYSTEM

Before treatment:

Muscle is thin and the circumference of muscle is short. Myofibrillar is loose with small density.

After treatment:

Muscle is strong and the circumference of muscle is long. Myofibrillar is strengthened and increased with large density.

treatment, 30 minutes,

20000 crunches or squats

100% supramaximal muscle contractions,

other exercises only reach to 20-30%

Abdominal muscle mass increased by 16%

Abdominal muscle firmness increased by 11%

FAT ACCUMULATION

When gain excess weight, more fat accumulates in the existing fat cells, causing them to swell and form cellulite. Fat accumulation can occur in the abdomen, buttocks and thighs. become fatter and flabbier.

FAT DISRUPTION

Electro Magnetic Wave, intensive supramaximal contractions enhance release of epinephrine which triggers a cascade effect leading to supramaximal lipolysis in fat cells.

FAT LOSS

After Genesis Sculptor treatment, targeted fat cells shrink in volume and are eliminated.

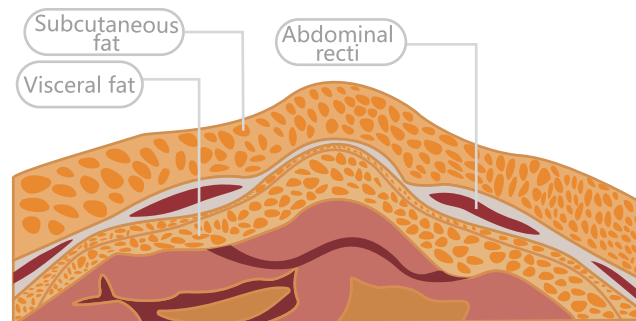

TO GET AN ATTRACTIVE BODY YOU NEED TO BURN FAT

Effect

BEFORE

Skin, fat and muscle form your overall body appearance.

DURING

The skin remains unaffected while the energy penetrates to fat and muscle layers.

AFTER

The skin remains unaffected while the energy penetrates to fat and muscle layers.

ARMS AND THIGHS FIRMING

Arms Firming Solution

Thighs Firming Solution

Firm the skin:

Due to weight fluctuations, pregnancies, passing time, and other factors, the skin gradually loses its tonicity and suppleness. Even though this skin sagging affects the entire body, certain areas are more susceptible to it: arms and inner thighs.

VAGINAL REJUVENATION

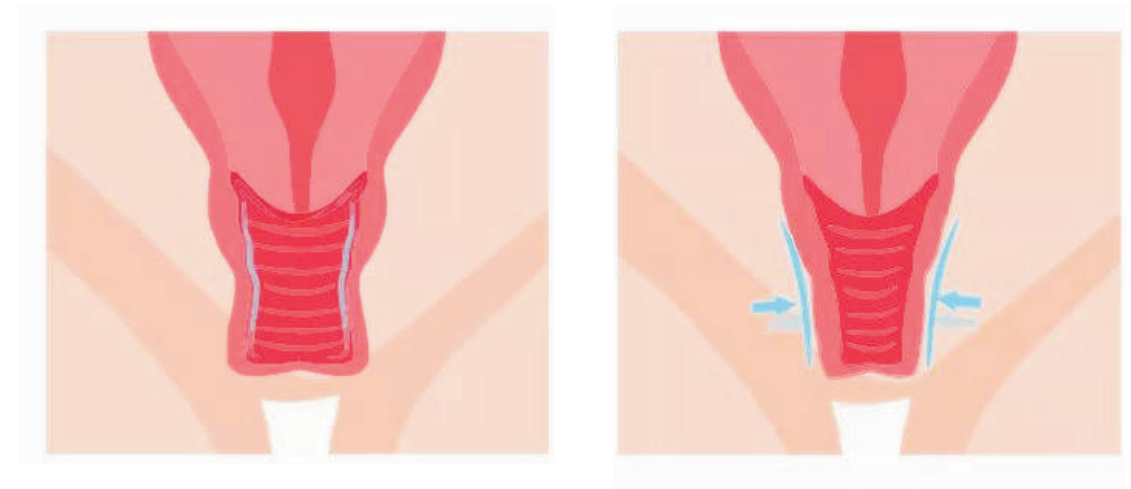

Rectus Abdominis Firming Solution

Firm the skin:

Genesis Sculptor System uses high-energy focused electromagnetic wave technology and high-magnetic pulses to generate directional motion force. One operation is equivalent to 10,000 Kegel exercises. It stimulates motor neurons to control pelvic floor muscle contraction, activates pelvic floor tissue, and promotes collagen regeneration.

Indications: vaginal relaxation, pelvic floor muscle relaxation, urinary incontinence, uterine prolapse, etc.
